

- Our 9cm collection will have a clear alphabetised pricing structure. With a large eye-catching label that is informative for end users.
- The availability will be steady and extensive with some seasonal additions in spring and refreshed in the summer.
- Consistent quality that you can rely on.
- The majority of our 9cm list will be A and B price code. This includes most of the best-selling varieties.
- On the weekly availability list there is a 'Stocking priority' and 'Current quality' section corresponding to every variety. This is updated weekly to ensure you are ordering the right plants at the right time.
- Take advantage of our years of experience and ensure to stock all priority 1 and quality 1. Look out for the green boxes.
- This traffic light system applies to all products.

New for 2026

- We have curated a collection of themed 6 packs aimed to simplify water gardening.
- **Blooming** - Complete with six 9cm pots aimed at breathing bright and bold blooms into your pond or plant area. Large carry handle label makes these products easy and convenient.
- **Fragrant** - Water plants should be enjoyed by all the senses, this themed 6 pack not only looks fantastic but is beautifully fragrant. Mint and sweet-scented rushes will add sensory joy to all who pass by.
- **Insect friendly** - Having a pond in the garden is one of the most eco-friendly things you can do from your home. This themed 6 pack is designed to attract pollinators with fantastic flowers. Emergents to allow dragon flies and other aquatic wildlife to thrive. The environment is at the forefront of customers minds and this is a great way to brighten the garden while being a little bit greener.
- **Native** - A collection of plants native to the UK. Strong and sustainable this themed 6 pack will thrive in ponds and water features around the country.
- **Oxygenating** - 6 pots of oxygenators to bring balance and purity to the aquascape. We know algae is a constant worry for pond keepers, this exciting oxygenating pack will help alleviate the stress bringing clarity and purity into ponds and your plant areas. We expect this to be a very popular product.

- The **new** 18cm basket is the ultimate finished product. The quality is guaranteed
- Consistent quality throughout the season that you can rely on with an increased range of varieties. Seasonal additions will be offered through spring and refreshed for summer sales.
- This collection of mature plants is perfect for planting. The large surface area gives the plant ample space to grow and develop.
- The strong mesh aqua basket allows the roots and shoots to anchor into banks, create rafts or float on the water surface and establish very quickly.
- Ideal for creating instant impact for any pond or water feature.
- A comprehensive selection of functional British natives to restore and maintain aquascapes and wonderful ornamentals adding texture, architectural interest and soften water edges.
- Beaver recommends stocking the 18cm collection heavily in the mid to late season as this has proven to drive sales and improve stock rotation.

- Oxygenators should account for 25% of your aquatic plant display. This should reflect directly in your sales.
- Available in outers of 10 with a large eye-catching label full of information. Complete with zonal diagram, planting depth and even flowering time. Allowing the end user to be confident when planting.
- Consistent quality you can rely on.
- Beaver recommends stocking these heavily in the early to mid-season. This has been reflected in our research, backed up by ongoing and historical sales trends.
- Comprehensive collection of Oxygenators that are vital to any aquatic ecosystem.
- Removing excess nutrients and putting oxygen back into the water allowing aquatic wildlife to thrive.

- The **new** 18cm basket is the ultimate finished product. The quality is guaranteed
- Oxygenators should account for 25% of your aquatic plant display. This should reflect directly in your sales.
- Available in Outers of 3 with a large eye-catching label full of information. Complete with zonal diagram, planting depth and even flowering time. Allowing the end user to be confident when planting.
- Consistent quality you can rely on.
- 18cm baskets are a mature ready to plant product for ease and impact. Full pots, very high quality.
- Beaver recommends stocking these heavily in the mid to late season. Our research shows that large basket sales increase this time of year. This in an ongoing sales trend.
- Comprehensive collection of Oxygenators that are vital to any aquatic ecosystem.
- Removing excess nutrients and putting oxygen back into the water allowing aquatic wildlife to thrive.

Contour Baskets

- Contours are very popular and are proven to be one of the best-selling products in aquatics.
- This product is designed with the customer in mind for easy gardening. Planted with 3 eye-catching varieties perfect for creating an instant impact in any pond or water feature.
- Large striking label adds colour and inspires customer to create a spectacular aquascape at home.
- The iconic kidney shape is designed to follow the curves of the pond.

18cm Floating Islands **New for 2026**

- Another popular product proven to be a consistent top seller. A must have product.
- Planted with 3 varieties and complete with a floating ring, allowing the basket to be placed directly into the water and gracefully bounce from bank to bank.
- These 18cm floating rings also fit our new 18cm collection meaning customers can extend the products use year after year.
- As the basket floats the roots of the plants are working hard to filter and purify the water, while the foliage and flowers add interest and attract pollinating insects.

Oxygenating Tubs

- Proven to be in very high demand. This containerised system extends the shelf life of the product and has pop up handles for convenience.
- *Ceratophyllum demersum* (hornwort) is a British native which is recommended to purify and oxygenate the water. By far the most popular oxygenating tub.
- *Elodea densa* is a south American oxygenator which is robust and a great alternative.

Floating Tubs

- A comprehensive collection of floating plants which suits all needs. Including native plants and some more unusual varieties to add interest.
- Floating plants create environments for wildlife to thrive by providing shade and cover. Filtering water to help keep the water clean and pure. Flowering to attract pollinators, like dragonflies, key to a diverse ecosystem.
- New for 2026 we are offering a small floating plant tub. This is to be run alongside our successful standard size to bolster variety and boost sales. If this proves to be a success throughout the trade we will bring it into our standard product range.

New despatch tray. Strong and holds water.
Reusable and returnable to Beaver

- Sold by colour our 11cm waterlilies are ideal for small ponds or water features.
- Supplied in a strong deep tray which holds water, meaning the lilies arrive to store fresh.
- The deep tray also allows you to display them in any area and extends the shelf life of the product. This tray can be reused and returned to Beaver
- Beaver recommends stocking heavily in the early season and transition to the larger products as the year progresses. This allows for regular stock rotation encouraging more frequent sales.
- The large handle-shaped label informs customers of planting depth and flowering time. Complete with zonal diagram to give customers confidence when planting.
- The 11cm size allows for upselling baskets and aquasoil.
